

▶ Multi-Wire Extensometers

Multi Wire Extensometers are low cost, easily installed safety monitoring devices.

The reflective colour bands indicate roof movement - at a glance. With tubular indicators operating side by side in the same reference tube.

The millimetre scales also allow accurate monitoring of movement trends.

Windows software is available from Golder RMT for the recording, presentation and analysis of Telltale data.

The Wire Extensometer has a completely Redesigned reference tube and anchor system to ensure in-hole stability and improved water diversion.

- ▶ Fully proven in coal mine tunnels
- ▶ Stainless steel reference tube anchor
- ▶ Positive stop stabilising fins
- ▶ Suitable for 35-50mm holes
- ▶ Improved water diverting system
- ▶ Corrosion resistant
- ▶ High grade stainless steel wire
